

Tic Frac Toe²

Play Fractal Tic Tac Toe! There are 9 games of tic tac toe, but they are connected by a special rule. When one player chooses a square in the small board, that sends the next player to the corresponding space in the bigger board where they play next. If the destination has already been won, then the player whose turn it is gets to choose which board they play next. When a player wins a small board, they mark that whole board with an X or an O. The player who connects 3 of the big boards wins the game!
